Re: Docket #07-16

Dear Secretary Dortch:

I am happy to see the **many** educational resources available **online** to our children. Students should be able to able to access these tools both in the classroom and at home. Teachers benefit from **these** online resources **as well** and should be able to use them **in the** classroom. Unfortunately **for** many teachers and students, the Internet is not available at home or **at school** and they **are** missing out on **the** incredible resources.

If the proposal brought forth by M2Z Networks to provide **free, fast**, family-friendly wireless broadband internet is implemented, teachers and students **would** be able to access the tremendous **online** educational tools and resources. Not only would this open **up great** opportunities for students, they **would** also be protected **while** online by the sophisticated filters provided with the service which **filter out the** smut seen so often online.

The **education** of America's children is important to **me**, as is the ability of **our** teachers to have **the** best possible resources any time they **need them**. I hope that you **will** support M2Z's **proposal** to provide **fast, free**, family-friendly wireless broadband internet access to all Americans.

Sincerely,

E. W. "Bill" Anderson, Jr.
Delegate - 8th District
